

KRAK IN DUB

Dub to Jungle - Live set

Technical Rider

backline needed:

- 1 Stage platform (2X1 Meter)
- 1 power multi-socket
- 1 mixer Pioneer DJM800 (or similar, please consult us)
- 2 DIs (to be plugged on DJM master)
- 2 SM58 microphones (1 on the DJM, the other on the main mixer if an MC is booked with KiD)
- 4 monitors (2 for DJ - 2 for MC). On 2 independents stereo circuits

We need 20 minutes to set up and 10 minutes for soundcheck

Krak in Dub sends full signal straight from the DJM (thru the DIs)

The booth should be directly plugged on the DJ monitors

If an MC is booked with KiD his mic should be plugged to the main mixer

The MC's microphone should have his own monitoring circuit.
